CASE STUDY: BAKERY AND CAKE SHOP WEBSITE

1. Problem Statement

Create a website for a bakery displaying cakes, pastries, cookies, custom cake designs, product prices, seasonal offers, and store contact details. Use a visually appealing color scheme and an image gallery.

2. Introduction

A Bakery and Cake Shop Website is a web-based platform that displays bakery products and their prices. It helps customers explore different types of cakes, pastries, cookies, and customized cake designs.

The website provides information about seasonal offers, special products, and store contact details. HTML is used to create the structure of the website, while CSS is used to design an attractive layout with suitable colors, fonts, images, and responsive sections.

This project uses only HTML and CSS without JavaScript.

3. Features

1. Home Page: Displays the bakery name and a welcome message.
2. Navigation Bar: Provides links to Home, Products, Gallery, Offers, and Contact sections.
3. Cake Collection: Displays different varieties of cakes with names, images, and prices.
4. Pastries Section: Shows different pastry varieties available in the bakery.
5. Cookies Section: Displays cookies with attractive images and prices.

6. Custom Cake Designs: Presents special cake designs for birthdays, weddings, and other celebrations.

7. Product Prices: Helps customers know the prices of bakery products.

8. Seasonal Offers: Displays special discounts and festival offers.

9. Image Gallery: Shows attractive pictures of cakes, pastries, cookies, and bakery products.

10. Contact Information: Provides the shop address, phone number, and email address.

11. Attractive Color Scheme: Uses suitable colors such as pink, cream, brown, and white.

12. Responsive Layout: Uses CSS media queries to adjust the website layout for mobile phones, tablets, and computers.

4. Applications

1. Customers can explore different bakery products online.

2. Customers can compare product prices before visiting the store.

3. People can view custom cake designs for special occasions.

4. The bakery can display seasonal offers and discounts.

5. Customers can find the shop's contact details and location.

6. Bakery owners can promote new products and special collections.

7. The image gallery helps customers view different product designs.

5. Future Scope

1. Add an online cake ordering system.

2. Provide online payment facilities.

3. Introduce home delivery services.

4. Add customer reviews and ratings.

5. Provide cake customization options.

6. Display product availability and updated prices.

7. Add a customer registration and login system.

8. Provide order tracking facilities.

9. Introduce loyalty programs and special customer discounts.

10. Improve accessibility and mobile responsiveness.

Note: These are possible future enhancements. The current project uses only HTML and CSS.

6. Technologies Used

HTML5

HTML is used to create the structure of the website, including headings, navigation links, product sections, images, and contact details.

CSS3

CSS is used to design the website with attractive colors, fonts, spacing, image galleries, product cards, hover effects, and responsive layouts.

JavaScript

JavaScript is not used in this project. All current website features are created using HTML and CSS.

7. Source Code

```
<!DOCTYPE html>

Sweet Donuts

Soft donuts with a sweet glaze.

₹80

Fresh Pastries

Perfect for your evening snack.

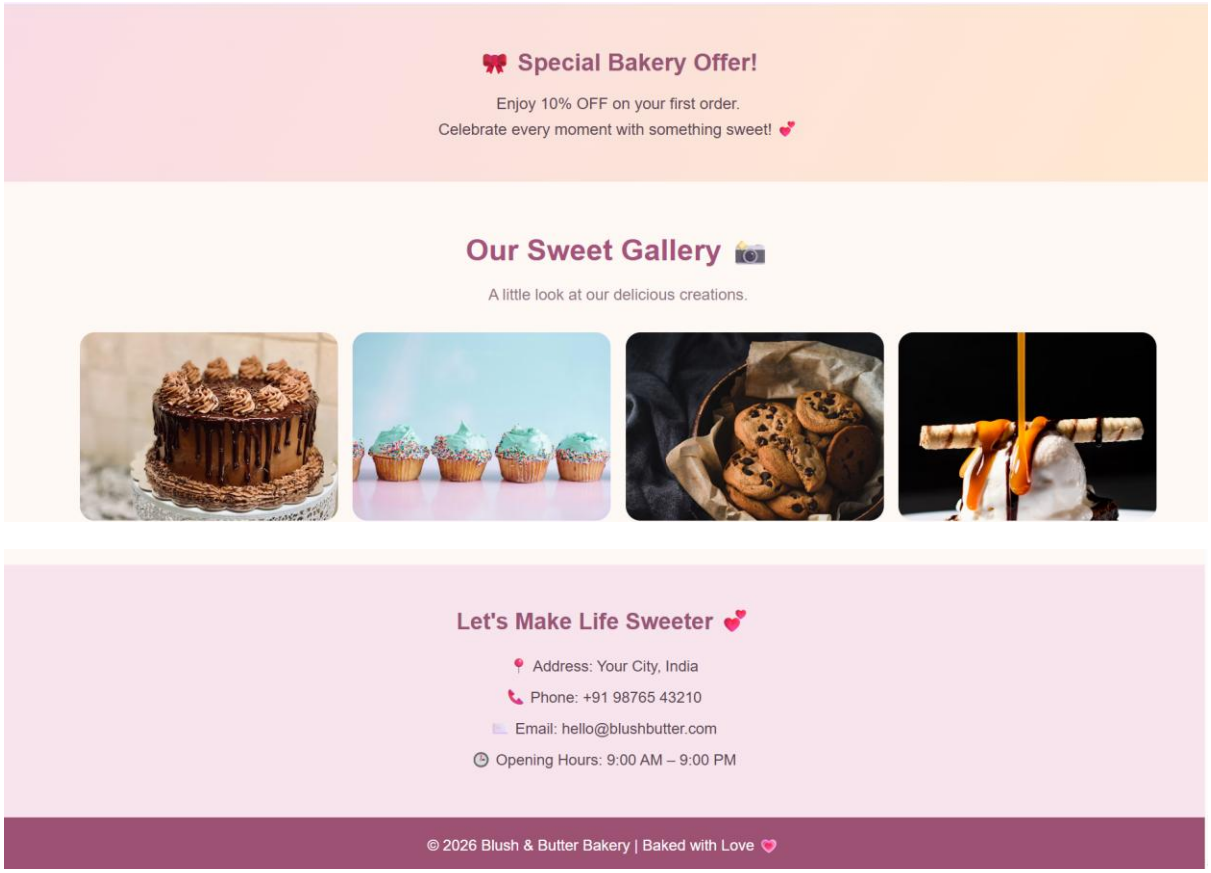

₹100

Butter Cookies

Golden, buttery and delicious.

₹130

9. Conclusion

The Bakery and Cake Shop Website provides an attractive way to display bakery products online. It allows customers to explore cakes, pastries, cookies, custom cake designs, prices, and seasonal offers. HTML creates the website structure, while CSS provides styling, image galleries, hover effects, and responsive layouts. This project helps students understand the basics of web development without using JavaScript.
